PROFILE

Computer Science student at the University of Porto who builds and deploys web apps end to end with Next.js, FastAPI and PostgreSQL, plus AI features. Seeking a junior full stack role, available immediately.

SELECTED PROJECTS

BookMatch

Team of 2

A book discovery platform that learns each reader's taste from swipes and refines recommendations in real time. Features genre-based discovery, search and a personal library with ratings and notes.

Next.js · TypeScript · Tailwind CSS · FastAPI · PostgreSQL · pgvector · GitHub Actions

LedgerDrop

Solo

An invoice-processing platform that extracts structured data from uploaded PDFs and validates it automatically. Uncertain results are routed to a human review workflow, where data can be approved, rejected or corrected.

FastAPI · SQLAlchemy · PostgreSQL · Next.js · TypeScript · Docker · Render · OpenAI API

Customer Support Agent

Solo

An AI-powered support assistant for a fictional online store, handling order tracking, cancellations and returns. Answers policy questions from the store's documentation and escalates complex cases to a human agent.

Python · FastAPI · OpenAI API · RAG · ChromaDB · SQLite · Docker
